“Most people feel safe and happy at home, even if it isn’t perfect. It is easy to find a place to live, but it is difficult to find a real home”.

Easy Living

“Our way of understanding
Life”

Lying on the sofa, kicking back, being who you really are, no makeup, no pressure, no tie on or heels.

“Carmenes, tradition and experience of master craftsmen who look after each and every detail.”

Happiness lies in fleeting moments. Moments of fun, comfort and enjoyment, alone or in company. Home is the real place of family life and personal rest. What is more, in the house, the sofa is a place set aside for well-being. To strike up conversations, to rest, read a book and enjoy a good film, moments that turn into small pleasures, it's a tiny oasis of happiness.

Lying on the sofa, kicking back, being who you really are, no makeup, no pressure, no tie on or heels. The sofa is where we share time and space with people we care about. It is where we make important decisions and where the best ideas come to mind. Very special places created from a piece of furniture that we have designed and made for many years at Carmenes, with the tradition and the experience of master craftsmen who look after each and every detail.

Our products are made with tender loving care, we know that we can design furniture to convey happiness and make people feel it. Experience what the Danish call 'hygge', such a deep feeling that surpasses joy and stays forever.

**“Home is the real place
of family life and personal
rest.”**

And of course, through the design and production, we take these feelings that we have at home to other places. To hotels, reception halls and contract areas. Even though there isn't a chimney or a cup of hot tea in your hand, they are spaces where you can sit on our sofas, armchairs and chairs, close your eyes and feel at home.

To this end, we work with some of the most distinguished product designers: Francesc Rifé, Lievore, Codina, Hoffman, La Mamba, Arnau Reyna, Héctor Diego and Jorge Pensi. Because we advocate luxury, a discreet type of luxury. The type that is perceived in the details, in comfort, in feelings, and in the experience of having a team of craftsmen who have been making sofas and armchairs for more than fifty years. This is how we make furniture that combines comfort, beauty, common sense and precision. Would you like to know how we shape those moments? Come and discover our new collection: Easy Living.
